Professional Summary

Computer Science Engineering graduate and aspiring MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, Node.js, JavaScript, and REST APIs. Experienced in developing responsive user interfaces, backend services, database integration, authentication, CRUD operations, and Git-based development. Completed a Full Stack Java Developer internship with exposure to frontend, backend, databases, APIs, and application development.

Technical Skills

Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, Java, JWT Authentication

Databases: MongoDB, Mongoose, MySQL, PostgreSQL

Tools: Git, GitHub, Postman, VS Code, npm, Vite, Docker

Concepts: MERN Stack, CRUD Operations, API Integration, Authentication, OOP, Data Structures

Experience

Full Stack Java Developer Intern – CampusPe

Internship

- Developed and tested web application components across frontend, backend, and database layers.
- Worked with HTML, CSS, JavaScript, Java, Node.js, Express.js, REST APIs, and relational databases.
- Built and tested CRUD APIs using Express.js and Postman for application data operations.
- Worked with JWT-based authentication, middleware, environment configuration, and API integration.
- Used Git and GitHub for source code management and collaborative development.

Projects

Wanderlust – Airbnb-Inspired Full Stack Web Application

MongoDB, Express.js, Node.js, JavaScript, EJS, Bootstrap, Cloudinary

- Developed a full-stack accommodation listing platform inspired by Airbnb using MongoDB, Express.js, and Node.js.
- Implemented CRUD functionality for property listings with server-side routing and persistent MongoDB storage.
- Added user authentication and authorization to control protected application operations.
- Integrated Cloudinary for image storage and implemented responsive interfaces for listing and property pages.
- Structured backend routes, controllers, models, and middleware for maintainable application development.

Risk Assessment Engine – Full Stack Team Project

React.js, Vite, REST APIs, Tailwind CSS, Java, Spring Boot, PostgreSQL

- Led frontend development for a risk management application designed to create, track, and assess risk records.
- Built reusable React components, risk tables, forms, pagination, sorting, validation, and loading states.
- Integrated frontend services with REST APIs for retrieving, creating, and updating application data.
- Implemented authentication flow and token handling for protected application functionality.
- Coordinated development tasks and Git-based collaboration as team lead.

Education

Bachelor of Engineering in Computer Science and Engineering

M.S. Engineering College – Visvesvaraya Technological University (VTU)

2022–2026

Core Competencies

Full Stack Development | MERN Stack | REST API Development | Database Management | Responsive Design | Debugging | Problem Solving | Git Version Control
